

KISHORE DP

Electronics & VLSI Design Undergraduate · AI-Assisted App, Web & Game Builder

kishoredp27@gmail.com | linkedin.com/in/kishore-dp | github.com/Kishore-DP | kishore-dp.github.io/Portfolio

EDUCATION

R.M.K. Engineering College

B.E. Electronics & Communication
Engineering — VLSI Design
Tamil Nadu, India · 2026–2030 (expected)

Chennai Public School

CBSE · Anna Nagar, Chennai
Class XII — 90% (2026) · Class X — 95% (2024)

CERTIFICATIONS

Data Science & AI

IIT Madras · Centre for Outreach & Digital
Education (CODE)
8-week certification · 2024

SKILLS

Builds With AI

Claude · AI Coding Agents · Prompt
Engineering

Ships

Web Apps · Mobile Apps · 3D / Interactive
Sites · Games

Tools & Platforms

GitHub · Vercel · Firebase · Figma · Roblox
Studio · VS Code

Electronics / IoT

Arduino · ESP32

ACHIEVEMENTS

- Basketball** — Intramural Winners, 2022–23
- Carrom** — Intramural Winner (2024–25 & 2025–26) · Promising Player (2025–26)
- Kho-Kho** — Silver, U-19 (2025)
- 4×100m Relay** — Silver, U-19 (2025)
- Football & Chess** — Intramural Runner-Up, 2025–26

SUMMARY

Incoming Electronics & Communication Engineering (VLSI Design) undergraduate and an AI-native builder. I turn ideas into shipped products — web apps, mobile apps, interactive 3D sites and games — by pairing product thinking with AI coding tools like Claude: I design it, direct the build, then deploy and refine it. I own projects end to end, from concept and UI to hosting and iteration, and back it up with hands-on electronics (Arduino / ESP32) that ties into my VLSI focus.

PROJECTS

SiteGen AI

IN DEV

Next.js · React · AI SaaS

An AI platform that turns a single Google Maps link into a fully hosted business website — imports business data via the Google Places API, generates copy and layout with Claude & ChatGPT, then deploys to Vercel / Cloudflare in minutes.

Interactive 3D Portfolio

LIVE

Three.js · WebGL · PWA

A walkable “medieval market” portfolio built on Three.js — BVH collision, draw-call batching and GPU-adaptive quality hold 60fps even on integrated graphics. Installable offline PWA.

Playnix

IN DEV

React Native · Expo · Firebase

A free, social music app — one search fans out across four open catalogues, downloaded tracks play fully offline, and a Firebase layer adds friends, chat, presence and shared playlists.

Steal a Brainrot (Roblox)

BUILDING

Lua · Roblox Studio

An original multiplayer base-building & PvP raiding game built ground-up in Roblox Studio — a server-authoritative economy, rarity-tiered income units, base defense and a rebirth prestige system.

LEADERSHIP & ACTIVITIES

- House Captain**, Diadem House — elected student leadership role, 2024–25
- INNOVERSE '25 Project Expo** — exhibited at SRM Institute of Science & Technology, Vadapalani (Nov 2025)
- Model United Nations** delegate — debate, diplomacy & public speaking

Open to: Internships, freelance work, hackathons and collaborations — anything that involves building.
